

# Vegetable Varieties for Gardeners

[vegvariety.cce.cornell.edu](http://vegvariety.cce.cornell.edu)

## Find the best vegetable varieties for your garden:

- Visit: <http://vegvariety.cce.cornell.edu>
- Search and sort through more than 5,000 varieties
- Read ratings and reviews by other gardeners
- Locate seed sources
- Share information about your favorite varieties (And those that don't do so well)

## Wanted: Vegetable Gardeners

More than 1,700 gardeners registered to rate varieties in the first two years after the site launched in January 2005. Those gardeners – representing every state and most Canadian provinces – contributed the first 3,000 vegetable variety reviews.

Join the fun. Visit the site and share your knowledge. Help us create Most Popular Varieties lists tailored for every state and frost free zone.

## Vegetable Varieties for Gardeners

## Welcome!

Curious which vegetable varieties might grow best in your garden? Cornell researchers are, too. This site compiles information from your fellow gardeners to help you decide what to try. [Read more](#) about this Citizen Science program. The information you supply can also influence breeding efforts and seed availability.

## View ratings

Search (box at left and on every page) or [browse](#) to see detailed descriptions of more than 4,000 vegetable varieties and how other gardeners have rated many of them.

## Rate varieties

Share your own opinions. Please [create a profile](#) and let your fellow gardeners build on your experiences of what worked and what didn't. If you've already created a profile, [login](#) before rating varieties.

## Need Help?

If you are not familiar with using on-line forms, see [How To Use This Site](#) to preview the site's features before you begin.

This is a beautiful assortment of color and flavor. Each one is slightly different in productivity and taste, but overall excellent. Something I grow every year.

Reviewer: [erinerskine](#) from MN

Produced way more kale than we could possibly eat. Very ornamental.

Beautifully colored, great tasting, and highly productive. Consistently performs well all season long and in a wide-range of weather conditions. Stems and leaves hold color even after cooking (if gently cooked). Makes a wonderful ornamental border.
