

A Favorite Meal

Vegetable Varieties Investigation

Purpose

Develop evidence of the important role biodiversity plays in daily lives

Overview

Students will describe their favorite meal and name ten ways biodiversity played a role in getting that meal to their plate.

Materials

- Paper
- Pencil

Time

15 minutes

Instructions

1. Working individually, instruct students to name their favorite meal and write this down on a piece of paper
2. Challenge each student to name ten ways biodiversity played a role in getting this meal to each student's plate.
3. After five minutes, allow students to work in pairs to help each other to complete their list of ten.
4. Come together as a group and ask for volunteers to share their favorite meals and ten roles of biodiversity. Allow for comparison and further discussion
